

# ORAGUARD® 215DU

High Quality Protection. No Silvering.

**Laminating Film** For the protection of indoor and outdoor UV printed, large format graphic applications.

#### Product Features

- 3-mil laminating film = Tailored for UV-curable inks
- 5-year outdoor durability = Perfect for long-term outdoor signage
- Specially formulated adhesive = Eliminates trapped air resulting in vivid prints with **no silvering**
- Strong adhesive bond = Prevents premature delamination

#### Benefits

Available Lengths	Available Widths	Finishes	UV Protection Extension Factor
150' (50-yard)	54", 60"	gloss, matte	+3 years

ORAGUARD® 215DU solves the #1 issue with laminating UV prints, silvering.

Silvering occurs when the laminating film adhesive doesn't fully adhere to the surface of a UV print. This is typically more noticeable in darker printed areas and the most common problem of laminating UV printed graphics. Use ORAGUARD® 215DU and say goodbye to silvering with a better bonding adhesive specially formulated for UV printed graphics.
